## Book 1

- 1 This new format carries 20 times more \_\_\_\_\_ than a CD-ROM.  
A hardware                                   B software                                   C data
- 2 He has written a piece of \_\_\_\_\_ that calculates your tax returns for you.  
A hardware                                   B software                                   C data
- 3 Many satellite channels are \_\_\_\_\_ so that they can only be received by people who have paid to see them.  
A encoded                                   B processed                                   C supported
- 4 Two principles are included in \_\_\_\_\_ : 'Fit for purpose', which means the product should be suitable for the intended purpose, and 'Right first time', where mistakes should be eliminated.  
A quality assurance                           B data processing                           C information security
- 5 I can be reached either by email or \_\_\_\_\_.  
A laptop                                   B cell phone                                   C server
- 6 A \_\_\_\_\_ would be really useful for working on the plane.  
A laptop                                   B cell phone                                   C server
- 7 A \_\_\_\_\_ is a computer program running to serve the requests of other programs.  
A mainframe                                   B supercomputer                           C server
- 8 A \_\_\_\_\_ is one of the most powerful machines worldwide.  
A handheld PC                                   B PDA   C supercomputer
- 9 Motherboards are generally air cooled with \_\_\_\_\_.  
A heat sinks                                   B expansion cards                           C processors
- 10 A \_\_\_\_\_ is the enclosure that contains most of the components of a computer.  
A fan   B processor                                   C case
- 11 Loading up new software requires removing the \_\_\_\_\_ from the machine.  
A fan   B motherboard                                   C heat sink

- 12** Depending on the form factor of the motherboard and case, around one to seven \_\_\_\_\_ can be added to a computer system.  
A hard drives                                   B expansion cards                           C processors
- 13** Customers can now try out the new \_\_\_\_\_ tablet PC.  
A device                                       B scroll wheel                           C touch screen
- 14** My laptop has a built-in \_\_\_\_\_ that collects crystal clear sound.  
A microphone                                   B mouse                                   C scanner
- 15** Doctors watched the patient's heartbeat on a \_\_\_\_\_.  
A monitor                                      B printer                                   C keyboard
- 16** Your camera, computer and \_\_\_\_\_ all use color, but they may not all display it in the same way.  
A microphone                                   B mouse                                   C printer
- 17** Students are encouraged to use the \_\_\_\_\_ as a resource.  
A network                                      B Internet                               C router
- 18** Companies need to use \_\_\_\_\_ to direct data traffic and connect to the Internet.  
A IP addresses                                B signals                                   C routers
- 19** Using a(n) \_\_\_\_\_, people can communicate efficiently and easily via email, telephone, chat rooms and more.  
A IP address                                   B configuration                           C network
- 20** A \_\_\_\_\_ is a computer network that interconnects computers in a limited area such as a home or a school.  
A CAT-5 cable                                B LAN                                   C DHCP
- 21** A common way to move or copy a file or folder is to select it and \_\_\_\_\_ it to another location.  
A drag   B minimize                               C maximize
- 22** A \_\_\_\_\_ is a virtual container within a digital file system, where groups of computer files can be kept and organized.  
A folder                                        B pointer                                   C menu
- 23** Shortcuts are very commonly placed on a desktop, and each shortcut can have its own \_\_\_\_\_.  
A menu                                        B icon                                   C pointer
- 24** I will send you the \_\_\_\_\_ by email.  
A font                                        B document                           C template

- 25** This software may not be \_\_\_\_\_ with older operating systems.  
A processing                           B compatible                           C formatting
- 26** It's always a good idea to run a \_\_\_\_\_ once you have finished writing your document.  
A format                               B layout                           C spell check
- 27** Some \_\_\_\_\_ are free and give you as many emails as you want.  
A POP3s                               B attachments                           C ISPs
- 28** Don't forget to notify all your contacts when you change your \_\_\_\_\_.  
A password                           B email address                           C Inbox
- 29** You can't gain access to the computer system without entering your \_\_\_\_\_.  
A password                           B email address                           C Inbox
- 30** For more information concerning our services, don't forget to visit our \_\_\_\_\_.  
A hyperlink                           B website                               C search engine
- 31** A \_\_\_\_\_ enables users to access, retrieve, and view documents and other resources on the Internet.  
A web host                           B web browser                           C website
- 32** Although Google is the most popular \_\_\_\_\_ in the world, it is not the only one.  
A hyperlink                           B website                               C search engine
- 33** He only wanted the face to appear in the photo, so he \_\_\_\_\_ it.  
A resized                             B adjusted                           C cropped
- 34** I love her use of \_\_\_\_\_, between light and darkness, in her photographs.  
A contrast                           B exposure                           C graphics
- 35** The small size of \_\_\_\_\_ makes them invisible to the naked eye.  
A pixels                             B graphics                           C images
- 36** Spreadsheets usually contain a number of supplied \_\_\_\_\_, such as arithmetic operations and statistical functions.  
A operators                           B database fields                   C functions
- 37** The \_\_\_\_\_ has eased the increasing difficulties in designing, building, and maintaining complex information systems.  
A formula                             B operator                           C database
- 38** On table worksheets, you can \_\_\_\_\_ columns either individually or in groups.  
A perform                           B sort                                   C analyze

- 39** Candidates must have extensive experience in website design and \_\_\_\_\_.  
A visibility                            B usability                            C navigation
- 40** There is a huge demand for people skilled in every area of e-commerce, especially \_\_\_\_\_.  
A functionality                        B navigation                        C Web Development
- 41** Your website is quite dull. Why don't you give it a more interesting \_\_\_\_?  
A appearance                        B content                            C visibility
- 42** A graphic designer may use typography, visual arts, and \_\_\_\_\_ techniques to produce his final result.  
A page layout                        B electronic pages                    C desktop publishing software
- 43** Programs such as Adobe InDesign, Microsoft Publisher, and Scribus are only some \_\_\_\_\_.  
A graphic designs                    B page layouts                        C desktop publishing software
- 44** If you need to use an extra picture, use \_\_\_\_\_.  
A offset lithography                B comprehensive layout            C clip art
- 45** A webcam's most popular use is the establishment of video links, permitting computers to act as videophones or \_\_\_\_\_ stations.  
A echo-cancellation                B videoconference                    C bandwidth
- 46** The wider the \_\_\_\_\_, the faster data can be sent.  
A monitor                            B video bridge                        C bandwidth
- 47** My new laptop has a built-in \_\_\_\_\_, so now we can communicate via Skype.  
A monitor                            B webcam                                C bandwidth
- 48** When you select an item online, you can place it into a \_\_\_\_\_, continue browsing and pay for it later.  
A shopping cart                    B banner                                C page view
- 49** On a website, you can find many complex \_\_\_\_\_, which can be advertisements with text, animated graphics, and sound.  
A banners                            B digital certificates                C page views
- 50** Nowadays, using \_\_\_\_\_ is as safe as handing your credit card over at a store or restaurant.  
A traffic                            B certificate authority                C e-commerce
